of inexpensive agricultural or forest wastes such as rice straw, corn cobs and saw dust. In the quest for economical and ecologically sound methods for environmental remediation, the use of mushrooms is a very good approach and solution Management from 'waste-to-wealth' is essential for more sustainable farming globally, and increasing mushroom production in India seems a viable and attractive option.

## 12. Programme Outcome:

1. The student can learn the process of mushroom cultivation technique.
2. The session was a fantastic opportunity for the students interested to launch their own business and increase their knowledge.
3. They have also gained knowledge about different types of Mushrooms and their particular season for cultivation.
